New FSP127 Complete kit shown

APPLICATION

The FRANCIS FSP 127 (MKV) signalling lantern fulfils the requirements and is fully approved to the MED Regulations and SOLAS, which states that "all ships of over 150 tons gross tonnage, when engaged on International voyages, shall have onboard an efficient daylight signalling lamp which shall not be solely dependent upon the ship's main source of electrical power." The 127mm (5") handheld signalling light can be used on all vessels, for ship to ship signalling using Morse Code. The light is of aluminium, lightweight and robust construction and is fully waterproof. If desired this unit can be used as a spotlight if the signalling trigger and lamp switch are both left on. The Francis Signalling Lantern is approved by the UK Maritime & Coastguard Agency (MCA.)

SPECIFICATION

- Capable of daylight signalling range of 8 miles.
- Beam divergence of 5°.
- Transmission rate of 12 words per minute achievable
- Light reduction & coloured filters provide control of light output as required.
- 5.5 metres of supply cable fitted as standard.
- All aluminium construction, fitted with a super purity aluminium parabolic reflector.
- Tubular and V sights are fitted as standard.
- Handle mounted switch to operate the lantern
- Signals made by triggering the tubular shutter system which interrupts the light from the reflector.
- Semi gloss black stoved enamel paint finish.
